

# New H4 Series Innovation coming from experience

**HMK 410 LC UHD** crawler excavator belonging to new H4 Series of HİDROMEK produced with the developed hydraulic system design; It offers superior performance by working quickly, productively and efficiently.

**HMK 410 LC UHD** provides high performance and efficient operation with its ultra-heavy-duty structure conforming for tough field conditions, its power, bucket capacity, breakout force, as well as its superior technology.

Performance..... Durability......8-11 Safety......12-13 Technology......14-15 Comfort......16-17 HİDROMEK Smartlink - Ease of Service......18-19 Technical Features ......20-25 The information and images, and equipment presented in this brochure are either standard or optional depending on the configuration. HİDROMEK has the right to modify the specifications and the designs of the model indicated in this brochure without prior notice.

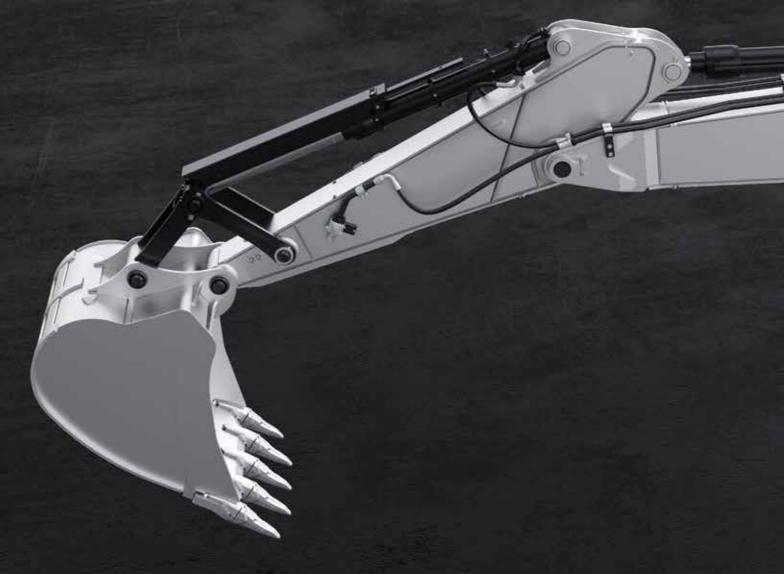

# Powerful. Strong. Balanced.

HMK 410 LCU HD, produced with the superior technology of H4 Series and its reinforced heavy-duty structure, offers safe and comfortable working in harsh field conditions by providing long-lasting and trouble-free usage through its durable structure.

HMK 410 LC UHD allows you to work at maximum capacity in different conditions with its robust and balanced structure, high performance engine, power and speed.

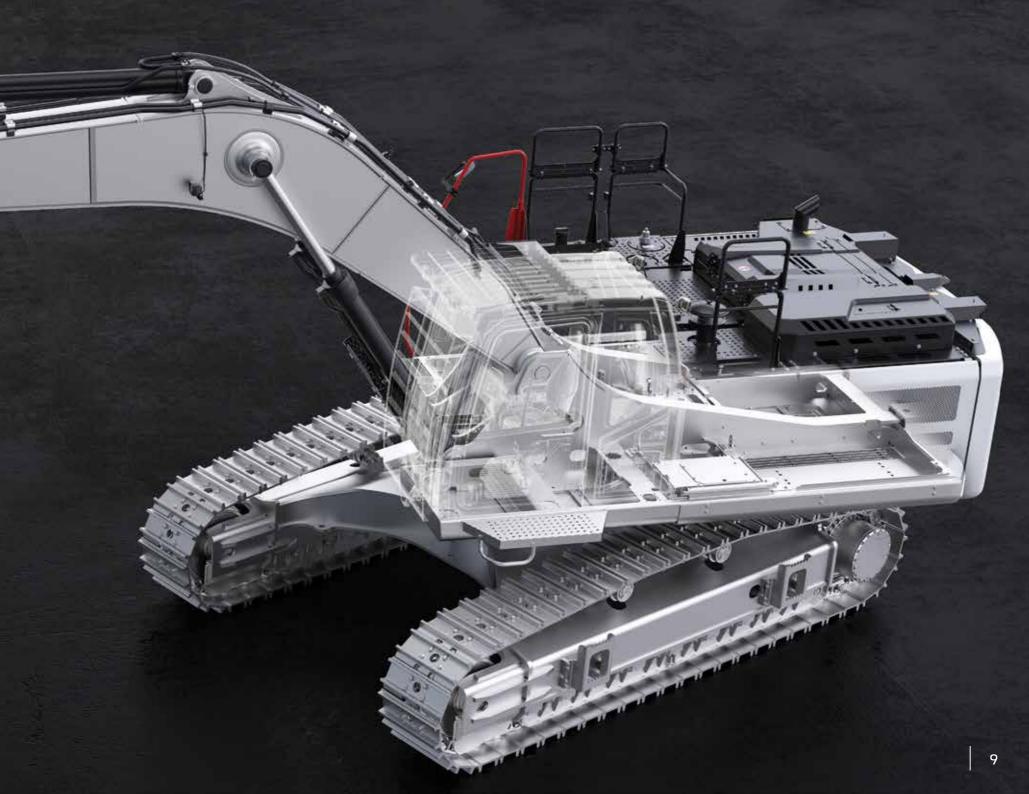

# Ultra Heavy Duty

HMK 410 LC UHD provides the most suitable performance for your work on challenging fields thanks to its ultra heavy duty structure and standard equipment. With its H4 Series technology, HMK 410 LC UHD offers fast and efficient working by providing time saving and takes your productivity to higher level.

# More durable

Produced to have reinforced heavy duty construction considering maximum performance, long life and smooth operation in severe field conditions, HİDROMEK excavators ensure more durability with the improvements made in the new H4 Series.

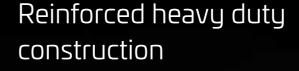

More durable anti-wearing plates (Hardox 450 HB)

Heavy duty arm

Reinforced boom structure

With their reinforced heavy duty construction produced at HİDROMEK's modern production facilities and going through sensitive quality-control processes, H4 Series excavators have excellent durability.

# Bronze-Graphite Bushings

Optimized bucket form

(2)

Reinforced arm supporting parts

Reinforced boom cylinder cast bearing

Reinforced lowerframe and undercarriage components

Bronze-graphite bushings used in boomarm and boom-frame connection points increase the lubrication period, and greatly prevent the wear of the pins because of graphite, having a very high grease absorption and retention capability, embedded in the inner structure of the bushings.

Reinforced casting tip

# Safe working environment

## ROPS&FOPS cabin

Having the standards of ROPS (Roll Over Protective Structure) & FOPS (Falling Object Protective Structure), H4 Series excavators provide maximum safety and durability.

Wide vision capacity
Designed with giving special importance to occupational safety, H4 Series ensure excellent vision by minimizing the blind spot on the side and rear cameras. Along with the increase in the number of led headlights, the night vision is significantly improved on H4 Series excavators; in addition, there are also red handles and warning labels providing maximum safety for the operator.

## Audio warning systems

H4 Series excavators enable safer working environment with their automatic starting horn, swing warning system and travel warning system.

# Shaped with technology

Electronic system of H4 Series excavators designed to protect the engine and hydraulic components to provide fuel saving and superior performance.

# Automatic stop system

In the new series, automatic stop system through configurable idling and stopping times provides fuel saving by stopping the engine after the machine is on idle. Automatic stop system in H4 Series helps to decrease the operational costs to minimum, and contributes to saving the environment.

# Safe fuel transfer pump

"Safe fuel transfer pump" added to H4 Series stops the pump automatically when the tank is full and this feature gets activated also when the pump does not transfer fuel for 30 seconds, and ensures that the pump stops automatically.

# Power boost technology

In H4 Series, power boost technology gets activated automatically in the conditions when the machine needs extra power, and ensures that the machine has the proper performance for the work.

## 8" Touch control panel

8 inch touch control panel is positioned ergonomically at a point that the operator can easily reach it. Touch control panel having high quality hardware and a large screen easily enables to control the machine features and access to machine information.

The features of touch control panel:

- It offers multi-language option
- Music system is integrated into 8 "touch control panel.
- •It allows the operator to adjust the flow required for the attachment without leaving the cab and save this information for 20 different attachments.
- During travel, rear and side view cameras with improved image quality and activated automatically can be controlled.
- Information on the average and instant fuel consumption can be obtained
- Information on status such as atmospheric pressure, turbo boost pressure, fuel pressure and hydraulic pump pressure can be obtained.
- •User can acquire working hour information such as work, attachment and travel
- Maintenance registries can be obtained, and the user is warned when the maintenance time approaches.
- Failure codes and registries can be obtained
- Audio warning systems can be controlled.

# The aesthetic design of power

HIDROMEK

The seat ergonomic, heated, air suspended and having 35 degrees adjustable backrest angle is provided in H4 Series, and it enables the operator to work comfortably and without getting tired for long working hours.

H4 Series which has many features\* such as proportional control pedals and joysticks, throttle control dial, operator touch screen, interior light, cup holder and heating-cooling box give more importance to user comfort.

\* Other features for user comfort on H4 Series machines can be found on page 21.

Office comfort in construction equipment

# Automatic air conditioning system

Air vents and air conditioning system which can automatically adjust itself according to the ambient heat located in the redesigned cabin provide the best cooling performance in its class by 30%.

## Wide angle view

On the new series machines, the new two-piece windshield wiper system designed for creating more comfortable work environment provides a wide angle view which increases the work efficiency of the user.

#### Led headlights for night vision Led headlights on new H4 Series machines

Led headlights on new H4 Series machines improve the night vision, and enable the operator to work more safely and comfortably.

## **Dampers**

By using 6 silicone dampers on H4 Series excavators, noise, shock and vibration are absorbed and prevented from being transmitted to the cabin under any working condition.

# You have the control with HİDROMEK SmartLink

Telematic system HİDROMEK Smartlink allows the user to easily access to machine location and technical information via computer and mobile phone.

#### Follow the work time and location of your machine through HİDROMEK Smartlink!

Through GPS tracking system, it is possible to track the location and the work time intervals of the machine.

#### Analyze your fuel consumption through HİDROMEK Smartlink!

It is possible to analyze fuel consumption according to the working conditions of the machine and daily fuel parameters.

#### Check the works for which your machine has been used through HIDROMEK Smartlink!

Through working mode information, it is possible to see the daily and total working hours of the machine for excavation and leveling and with crusher or with other optional attachments besides the power mode information and the speed ranges.

#### Follow your machine's maintenance through HIDROMEK Smartlink!

Under the Alerts list, the machine's upcoming maintenance can be checked while the information of the nearest authorized service can be obtained, and it can be contacted.

#### Contact the nearest authorized service or regional service through HİDROMEK Smartlink!

With the application, it is possible to obtain the information on Regional and Authorized Services of HİDROMEK After Sales Services as well as the directions to them.

# Have performance reports for the selected periods of time for your machines through HIDROMEK Smartlink!

For any selected periods of time, it is possible to have a report on daily fuel consumption, average fuel consumption, power and working modes, daily work time intervals and locations.

# Easy maintenance and fast serviceforH4Seriesthrough safe and easy access

H4 Series excavators, designed considering fast access to hydraulic and engine equipment, provide easy maintenance and service. Most of the maintenance can be easily carried out without getting on the machine, which shortens the service time and increases machine work time.

Automatic greasing system ensures that all parts of the machine can be lubricated from one single center.
